Change is in the air and it's not just because the leaves are changing and the smell of pumpkin spice lingers. As we head into fall, we're seeing a whole new line of lipstick colors that stray from the wine, berry and oxblood shades we're used to. From pinks to browns there is something for every skin tone, here is a peak at four of the new colors we love:

1. **Soft Melon.** It's a cutting edge color that enhances the colour luminosity, making it both wearable and chic. Try F/W Runway Rouge D'Armani Sheer by Giorgio Armani.
2. **Purple Passion.** This pout-provoking color makes a saturated statement with exceptional pigmentation. Try Pure Color Envy Matte Sculpting Lipstick in Stronger by Estée Lauder.
3. **Brick Red.** Providing a full-bodied, velvety color this rich, vivid shade compliments everything from neutrals to high-fashion hues. Try Semi Matte Lipstick in VIP Red by NARS.
4. **Mauve Move.** Give into temptation with this dazzling color and engage in a unique sensorial experience with extreme shine and comfort. Try Rouge Volupté Shine No. 35 Fuschia in Grunge by YSL.
